

REGISTERS

Using Registers

```
---
- name: Play1
  hosts: all
  tasks:
    - name: Create a file
      file:
        path: /home/client/abcd.txt
        state: touch
        register: grras

    - name: See the Output
      debug:
        var: grras

~
```

Using Selective Registers

```
---
- name: Play1
  hosts: all
  tasks:
    - name: Create a file
      file:
        path: /home/client/abcd.txt
        state: touch
        register: grras

    - name: See the Output
      debug:
        var: grras.diff.after.mtime

~
~
```

ANSIBLE SECRETS

To Encrypt:
ansible-vault encrypt <playbook_name>

To Decrypt:
ansible-vault decrypt <playbook_name>

When the Playbook is Encrypted

To Edit:
ansible-vault edit <playbook_name>

To View:
ansible-vault view <playbook_name>

To Run the Playbook:
ansible-playbook <playbook_name> --ask-vault-pass
